

Fully Transparent Brackets

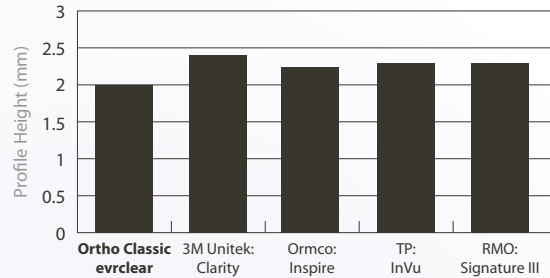

Eloquent Aesthetics

Our new evrclear brackets are the next generation in aesthetic orthodontics. Unlike the tooth-colored ceramic brackets, ours are transparent and require no color-matching for specific teeth.

Low-Profile 2mm Design

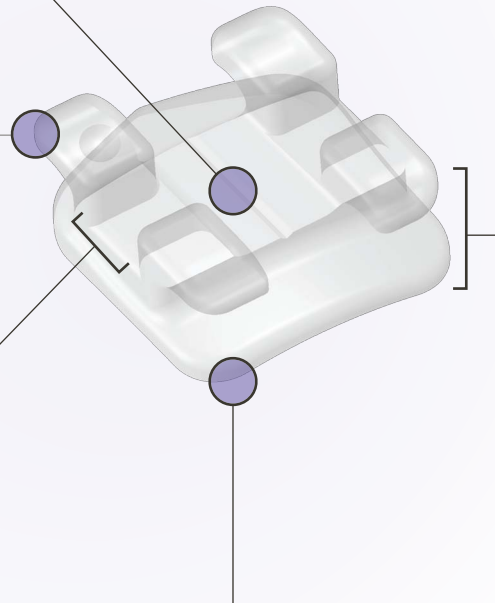

Minimal Protrusion

Rounded Corners & Dome Shape

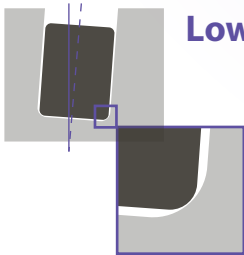

Improved Comfort

It's no secret that patient comfort is vastly important to the orthodontic industry. Our evrclear brackets have rounded edges and corners to ensure patient satisfaction. Not only are our brackets difficult for others to detect, but your patient will appreciate the unobtrusive design.

Low-Friction Slot Design

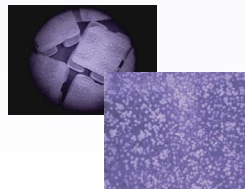

Easy Sliding

- » Reduced corner frictional resistance
- » Easy sliding by line connection
- » Surface of slot improved by polishing
- » Base Torque technique allows for a unique bracket design.

Coated Base System

Superior Bonding

enlarged photo of base texture

The coated base system forms a base that is compatible with all kind of orthodontic adhesives, giving excellent bonding strength. It also makes debonding easier with micro-protuberances similar to metal brackets.

Shear Bonding Test	evrclear	Inspire Ice	Clarity	Resin	Metal
Bonding Strength	0.187241	0.149034	0.169945	0.082556	0.160442
